Ansible role to manage Jenkins Job Builder

- License: Apache License, Version 2.0
- Documentation: <https://ansible-role-jenkins-job-builder.readthedocs.org>
- Source: <https://git.openstack.org/cgit/openstack/ansible-role-jenkins-job-builder>
- Bugs: <https://bugs.launchpad.net/ansible-role-jenkins-job-builder>

---

### Description

---

Jenkins Job Builder takes simple descriptions of Jenkins jobs in YAML or JSON format and uses them to configure Jenkins. You can keep your job descriptions in human readable text format in a version control system to make changes and auditing easier.

---

## Requirements

---

See *bindep.txt* for role dependencies.

## Packages

Package repository index files should be up to date before using this role, we do not manage them.

---

## **Role Variables**

---

```
# Name of the user to be used.  
# Default: root  
jenkins_job_builder_user_name: root  
  
# Name of the group to be used.  
# Default: root  
jenkins_job_builder_user_group: root
```

---

## Dependencies

---

---

## Example Playbook

---

```
- name: Install jenkins job builder
  hosts: jenkins
  roles:
    - ansible-role-jenkins-job-builder
```
